### **Ernst Achieves Explosive Company Growth in 2013**

*New products and clients in the wake of the company's patent contributed to its growth*

**ALBANY, NY—May 28, 2014—**Ernst Publishing Company, the leading provider of technology and closing cost data for the real estate and home finance industries for the past 25 years, announced today that a final analysis of its 2013 performance shows the highest rate of growth the company has experienced in the past 15 years.

“Being a privately held corporation, we don’t often issue releases about company performance, but this can only be described as explosive growth,” said Gregory E. Teal, president and chief executive officer of Ernst Publishing. “Adding a fifth top five bank to our client list helped, but last year we also added many mid-tier lenders who are eager to provide more accurate closing cost data to their customers at the point of sale. We also processed our 1 billionth transaction.”

In terms of revenue, 2013 was a banner year for the company. Over the past five years, Ernst publishing has grown tremendously, increasing the number of people it employs in every department. In response to this growth, the firm moved into a new data facility last fall.

In 2012, the company earned its first U.S. patent for technologies it has developed. Ernst processes more than 150,000,000 transactions annually for its clients through a variety of delivery channels.
